• **CONTROLLER GENERAL OF PATENTS, DESIGNS, & TRADE MARK (CGPDTM):**

□ CGPDTM Offices & its Functions

• **INDIAN PHARMA INDUSTRY:**

□ Overview of Indian Pharma Industry

• **WORK OPPORTUNITIES IN RA & IPRS DEPARTMENT:**

□ Role of RA Professional in Pharmaceutical company, RA Roles in various functions in an organization, Career Approach towards RA Department, Interview Questionnaire on RA

• **PRACTICALS:** Registration Guidelines Search, Dossier Preparation

COURSE OUTCOMES:

Upon completion of this course the students shall get

- Adequate knowledge on patent and copyright for their innovative research works
- During their research career, the knowledge gained through this course shall provide useful insights on the novelty of their idea from a state-of-the-art patent search.
- This provides a further way for developing their idea or innovations.
- This course shall pave the way for the students to catch up Intellectual Property(IP) as a career option such as:
 - R&D IP Counsel
 - Government Jobs – Patent Examiner
 - Private Jobs in Pharmaceutical sector related to patent search, patent drafting and patent filing.
 - Patent agent and Trademark agent
 - Entrepreneur

BIOCHEMISTRY

PROF. SWAGATA DASGUPTA

Department of Chemistry
IIT Kharagpur

Course 21- Syllabus with course outcomes

PRE-REQUISITES : Basic concepts in Chemistry and Biology

INTENDED AUDIENCE : Core course BSc/MSc/MS/PhD

COURSE OUTLINE :

This course is an introductory course that will focus on basic concepts in biochemistry. The course deals with an understanding of biological macromolecules: proteins, carbohydrates, lipids, and nucleic acids. The structure and functional roles of the macromolecules will be studied in addition to fundamentals of enzyme chemistry: kinetics, mechanisms, inhibition, structure and mechanism. The course will also touch upon the basics of membrane transport and bioenergetic principles. After completion of the course, the students should be able to understand the chemical properties and three-dimensional structure of these biological macromolecules in relationship to their biological function.

ABOUT INSTRUCTOR :

Professor Swagata Dasgupta completed her B.Sc. (Hons) in Chemistry from Presidency College, Kolkata and her M.Sc. from IIT Kanpur. After a Post M.Sc. in Bioscience she obtained her Ph.D. from Rensselaer Polytechnic Institute, USA. She then joined IIT Kharagpur and initiated research in Protein Chemistry in the Department of Chemistry at IIT Kharagpur. Her areas of interest are protein-protein and protein-small molecule interactions and protein structure analyses. Professor Swagata Dasgupta has contributed to teaching and research at IIT Kharagpur for the past 25 years. She has over 150 publications in peer reviewed journals with over 3800 citations. Her interdisciplinary research activities in biophysical chemistry have led to several ongoing research collaborations. Over the years her laboratory has become an active center of research with generous support from funding agencies. Graduate students from her laboratory are well-placed both in India and abroad. Her teaching contributions range from classroom teaching, web-course development, introduction of new courses and teaching laboratories, development of curriculum, and initiation of research in a new area in the department. A video course in Biochemistry under the aegis of the National Program on Technology Enhanced Learning funded by the Ministry of Human Resource Development has received overwhelming response worldwide by both students and educators. She has given many popular lectures to young scholars and students and has been invited to inspire young women to science. She has served on many Interview boards and is also actively involved as a reviewer in many journals. Her contributions have been recognized by the award of the Bronze medal by the Chemical Research Society of India (CRSI) for 2016. She also received the Darshan Ranganathan Memorial Lecture Award of CRSI in 2013. She was inducted as a Fellow of the West Bengal Academy of Science and Technology, India in 2014. She is an elected Member of the National Academy of Science, Allahabad since 2013 and a Fellow of the Indian Academy of Sciences, Bangalore since 2018.

COURSE PLAN :

Week 1: Amino Acids

Week 2: Protein Structure

Week 3: Protein Structure (continued)

Week 4: Enzymes

Week 5: Enzymes(continued)

Week 6: Enzyme mechanisms

Week 7: Lipids and Membranes

Week 8: Nucleic acids

Week 9: Vitamins and Coenzymes

Week 10: Carbohydrates

Week 11: Bioenergetics

Week 12: Metabolism

MEDICINAL CHEMISTRY

PROF. HARINATH CHAKRAPANI

Department of Chemistry
IISER Pune

Course 22- Syllabus with course outcomes

PRE-REQUISITES : Any student who has done basic organic chemistry and has some knowledge of biochemistry with an interest in drug discovery

INTENDED AUDIENCE : Third year undergraduates of B.Sc. Chemistry; M.Sc. Chemistry students and doctoral students

INDUSTRIES APPLICABLE TO : Companies in the pharmaceutical sector may recognize and value this course.

COURSE OUTLINE :

The main objective of this course is to familiarize students with the fundamental concepts of drug discovery and development. The course is intended for students who have a background in chemistry and interested in the process of drug discovery. The intended outcome is to train students on various aspects of new drug discovery/development, drug screening, target identification, lead discovery, optimization and the molecular basis of drug design and drug action.

ABOUT INSTRUCTOR :

Prof. Harinath Chakrapani completed his undergraduate and post-graduate studies in Chemistry from Loyola College and Indian Institute of Technology Madras, respectively. He moved to Duke University, USA to pursue his doctoral studies and after post-doctoral research stints at Wake Forest University and the National Cancer Institute, USA, he joined IISER Pune in July 2009 and is currently Associate Professor.

COURSE PLAN :

Week 1: An overview of drugs and drug targets; structure of a cell; intermolecular binding forces; classification of drugs.

Week 2: Principles of enzyme structure, catalysis and inhibition in drug discovery: enzyme catalysis and inhibition in drug discovery;

Week 3: Principles of enzyme structure, catalysis and inhibition in drug discovery: Enzyme mechanisms overview; case

Week 4: Receptors function and ligand binding interactions; Ion channel receptors; kinase-linked receptors; G-Protein coupled receptors, drug-receptor interaction; dose-response curves; case

Week 5: Nucleic acids structure and function; DNA Interactive agents and chemotherapy: DNA binding agents; intercalation and alkylation; DNA strand breakers; case studies

Week 6: Synthetic methods in medicinal chemistry: Combinatorial and parallel synthesis: solid phase techniques, mix and split method in combinatorial synthesis;

Week 7: Lead discovery; Bioassays; drug targets; Lead Modification; optimization; pharmacophore; homologation; bioisostere; chain branching;

Week 8: Electronic effects; Lipophilicity; Structure-Activity Relationships; Quantitative-structure activity relationships (QSAR).

Week 9: Drug metabolism and pharmacology: Analytical methods in metabolism; Phase I and II transformations; ADME; bioavailability; pre-clinical and clinical development; therapeutic index and therapeutic window.

Week 10: Prodrugs and drug delivery systems: Use of prodrug systems; prodrugs for stability, solubility and slow release; overview of drug delivery

Week 11: Drug resistance mechanisms and synergism: Mechanisms of drug resistance;

Week 12: circumventing drug resistance; drug synergy

Industrial Pharmacy

Course Co-ordinator: Swayam- Mooc-Dr Ajay Semalty ,HNB Garhwal University
(A Central University) Srinagar Garhwal (Uttarakhand)

Syllabus:

Week 1 Preformulation I

Preformulation I: Physical form (crystal & amorphous),
Preformulation I: polymorphism, particle size, shape
Preformulation I:, solubility profile (pKa, pH)
Preformulation I: Partition coefficient, flow properties

Week 2 Preformulation II

Preformulation II: Hydrolysis, oxidation, reduction
Preformulation II: Racemisation,
Preformulation II: Dissolution, permeability & BCS classification
Preformulation II: Polymerization

Week 3 Tablets

Tablets: Introduction, classification of tablets. Formulation/preparing of tablets, granulation methods.
Tablets: Compression and processing problems. Equipment and tablet tooling, Tablet defects.
Tablets: Tablet coating: Types, coating materials, formulation of coating composition, methods of coating, equipments employed and defects in coating
Tablets: QC of tablets: apparatus, methods, graphical presentations, official and unofficial tests.

Week 4 Liquid Orals

Liquid orals: Formulation and manufacturing of solution, syrups and elixirs, Filling and packaging
Liquid orals: Emulsions: I
Liquid orals: Emulsion II
Liquid orals: Suspensions: Formulation, evaluation

Week 5 Parenterals I

Parenterals I: Introduction, Preformulation of parenterals
Parenterals I: Formulation of Parenterals

Week 6 Parenterals I

Parenterals I: Types of Parenteral preparation
Parenterals I: Lay out and Production facilities

Week 7 Parenterals II

Parenterals II: Pyrogens and pyrogenicity
Parenterals II: Quality control of parenterals

Week 8 Capsules

Capsules: Introduction, Advantages, Disadvantages, Capsule Production, hard Gelatin capsules
Capsules: Methods of filling capsules, Soft Gelatin Capsules
Capsules: Formulation Consideration, Production of soft gelatin capsules, Non-gelatin soft capsules
Capsules: Evaluation of commercial capsules

Week 9 Pellets and Ophthalmic Preparations

Pellets: Introduction, formulation, pelletization process, equipment needed
Ophthalmic Preparations: Introduction, absorption through eye, formulation considerations

Ophthalmic Preparations: formulation of eye drops, lotion, ointments

Ophthalmic Preparations: Methods of preparation; labeling, containers Evaluation

Week 10 Pharmaceutical Aerosols

Pharmaceutical Aerosols: Definitions, Advantages, Limitation, Uses

Pharmaceutical Aerosols: Components of aerosols

Pharmaceutical Aerosols: Components and systems of aerosols

Pharmaceutical Aerosols: inhalers and Evaluation of Aerosols

Week 11 Cosmetics

Cosmetics: Introduction, absorption through skin, types of cosmetic preparations, Formulation of tooth pastes

Cosmetics: Formulation of lipsticks, shampoos, hair dyes

Cosmetics: Formulation of cold cream and vanishing cream, sunscreens

Week 12 Packaging Materials Science

Packaging Materials Science: Materials used for packaging of pharmaceutical products,

Packaging Materials Science: Factors influencing choice of containers Legal and official requirements, Stability aspects,

Packaging Materials Science: Quality control tests of packaging materials

Course Outcomes:

The course has been designed with the aim that after completing this course, you should be able

- ✓ To identify and practice Dosage forms; and their manufacturing techniques
- ✓ To practice all the related and practical aspect of dosage form development
- ✓ To formulate and evaluate solid, liquid and semisolid dosage forms
- ✓ To correlate the theoretical knowledge with professional and practical need of pharmaceutical industry.
